

COMPANY PROFILE

KMK General Contractors was founded in 2004 and became licensed with the Nevada State Contractors Board in 2005 with a 'B' classification specializing in commercial and upscale residential projects. KMK is committed to providing its clients with exceptional service and value through relationships and a knowledge base of the Las Vegas market that spans over 20 years. Our relationships with Architects, Engineers, Consultants, Designers, Subcontractors and Suppliers allow us to provide services beyond that of just a General Contractor.

PRE CONSTRUCTION/BUDGETING

KMK is aware that every client is concerned with value and cost control. KMK provides budgeting, scheduling and cost analysis which can be started in early phases of a project. This allows Designers and Clients to be informed early in the process regarding budgetary costs and schedule for their project.

DESIGN-BUILD

KMK has relationships with local Architects, Engineers, Consultants and Designers which allow us to provide a turn key project to the client. Design/build project success is accomplished by applying a comprehensive project team management delivery system. The KMK Construction team's experience covers a broad range of professional services, from consulting and feasibility studies, to the complete design, engineering and construction expertise to fully implement a project. The planners, designers, engineers and builders work in concert throughout the entire project toward the common goal of providing a quality product at a competitive price.

MANAGEMENT/CONSTRUCTION

KMK's management team has extensive experience in management of office and field operations in the Las Vegas market. At KMK, construction management services provide assurance to the client of a well-run, problem-free job site. The team of experienced construction professionals provides cost control, scheduling coordination, quality control and timely execution of plans throughout the project. KMK's knowledge of local building codes, life safety requirements, permit requirements and the construction process is critical in the project's on-time and on-budget completion according to plan. The client's interest is represented throughout the project, from start to finish.
